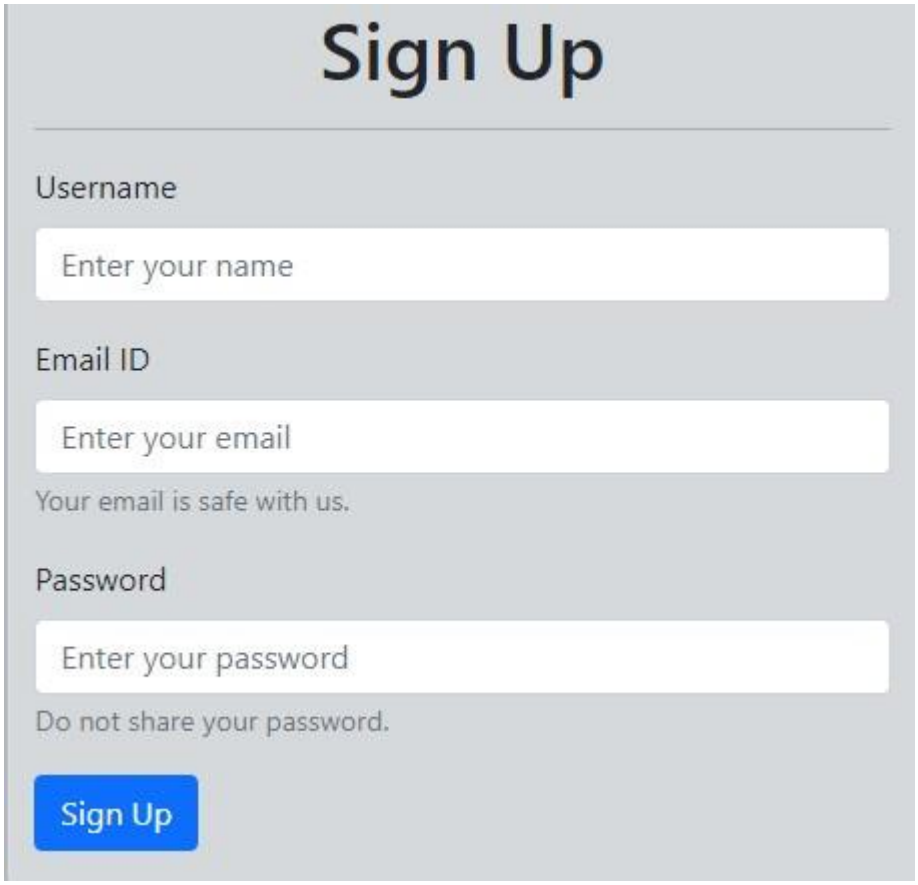
Lab #5(b)

Lab#5(b) Implement registration page and login system with session management

Final Outcome:



Lab #5(b)

Code Snippet:

```
div class="container col-4 border rounded bg-light mt-5" style='--bs-bg-opacity: .5;'>
 <h1 class="text-center">Sign Up</h1>
 <hr>
 <form action="" method="post">
  <div class="mb-3">
   <label for="name" class="form-label">Username</label>
   <input type="text" class="form-control" name="name" placeholder="Enter your name" autocomplete="off" required>
  </div>
  <div class="mb-3">
   <label for="email" class="form-label">Email ID</label>
   <input type="email" class="form-control" name="email" placeholder="Enter your email" autocomplete="off" required>
   <small class="text-muted">Your email is safe with us.</small>
  </div>
  <div class="mb-3">
   <label for="password" class="form-label">Password</label>
   <input type="password" class="form-control" name="password" placeholder="Enter your password" required>
   <small class="text-muted">Do not share your password.</small>
  </div>
  <div class="mb-3">
   <input type="submit" name="signup" value="Sign Up" class="btn btn-primary">
  </div>
 </form>
</div>
```
