

Lab #12(a)

Lab #12(a) Implement Delete Operation in Laravel with GUI.

COMMAND USED	ATTRIBUTES USED	DESCRIPTION
Artisan	make:controller, make:model, make:migration, serve	In Laravel, Artisan is a command-line tool that provides a wide range of commands for various tasks related to the development and management of Laravel applications. Artisan simplifies common development tasks by automating them through command-line commands.

Final Outcome:

Lab #12(a)

Code Snippet:

BookController code:

```
public function destroy($id)
{
    $book = Book::where('id', $id);
    $book->delete();
    return redirect()->route('books')->with('success', 'Book deleted successfully');
}
```

Route(web.php):

```
Route::get('/dlt-book/{id}', [BookController::class, 'destroy']->name('books.destroy');
```

Blade file:

```
<a class="btn btn-danger" data-bs-toggle="modal" href="#dltbookM{{ $book->id }}"
    role="button">Delete</a>
<div class="btn-group me-2" role="group" aria-label="Second group">
    <div class="modal fade" id="dltbookM{{ $book->id }}" data-bs-backdrop="static"
        aria-hidden="true" aria-labelledby="dltLabel" tabindex="-1">
        <div class="modal-dialog modal-dialog-centered">
            <div class="modal-content">
                <div class="modal-header">
                    <h5 class="modal-title" id="dltLabel">Confirmation</h5>
                    <button type="button" class="btn-close" data-bs-dismiss="modal"
                        aria-label="Close"></button>
                </div>
                <div class="modal-body">
                    Are you sure to delete this book ?
                </div>
                <div class="modal-footer">
                    <a class="btn btn-outline-primary"
                        href="{{ route('books.destroy', $book->id) }}">Yes</a>
                    <button class="btn btn-outline-danger" data-bs-
dismiss="modal">No</button>
                </div>
            </div>
        </div>
    </div>
</div>
```
